THE RATE AT WHICH HIV/AIDS SPREADS IN DIFFERENT DISTRICTS
OF UGANDA

1 INTRODUCTION.

This research was conducted in different districts of uganda to show the rate at which HIV/AIDS is spreading for the last five years.

2 WHY THIS RESEARCH WAS CONDUCTED.

The research is going to help the government to know how HIV/AIDS is spreading in its districts and the government will determine ways to reduce the increase and know which districts need more attention.

3 The following is the sample of data collected.

Years	District	Percentage increase	GPS co-ordinates
2012-2016	Wakiso	(5-10)	24
2012-2016	Kampala	(7-12)	34
2012-2016	Mbale	(9-17)	14
2012-2016	Kalangala	(12-22)	24
